# 2022-2023 Middle School Virtual Challenge Meet #3

## Calculator Applications

### DO NOT OPEN THE TEST UNTIL INSTRUCTED TO BEGIN

- I. Calculator Applications rules and scoring—See UIL Constitution
  - a. You will be given 30 minutes to take this test.
  - b. There are 80 problems on this test.

### II. How to write the answers

A. For all problems except stated problems as noted below—write three significant digits.

1. Examples (\* means correct but not recommended)

Correct: 12.3, 123, 123.\*, 1.23x10\*, 1.23x10<sup>0\*</sup>, 1.23x10<sup>1</sup>, 1.23x10<sup>01</sup>, .0190, 0.0190, 1.90x10<sup>-2</sup>

Incorrect: 12.30, 123.0, 1.23(10)<sup>2</sup>, 1.23·10<sup>2</sup>, 1.230x10<sup>2</sup>, 1.23\*10<sup>2</sup>, 0.19, 1.9x10<sup>-2</sup>, 19.0x10<sup>-3</sup>, 1.90E-02

2. Plus or minus one digit error in the third significant digit is permitted.

B. For stated problems

1. Except for integer and dollar sign, as detailed below, answers to stated problems should be written with three significant digits.
2. Integer problems are indicated by (integer) in the answer blank. Integer problems answers must be exact, no plus or minus one digit, no decimal point or scientific notation.
3. Dollar sign (\$) problems should be answered to the exact cent, but plus or minus one cent error is permitted. The decimal point and cents are required for exact-dollar answers.

### III. Some symbols used on the test

- A. Angle measure: rad means radians; deg means degrees.
- B. Inverse trigonometric functions: arcsin for inverse sine, etc.
- C. Special numbers: π for 3.14159 ...; e for 2.71828...
- D. Logarithms: Log means common (base 10); Ln means natural (base e).

### IV. Scoring:

1. Problems answered correctly are worth FIVE points. FOUR points will be deducted for all problems answered incorrectly or skipped before the last problem attempted.

23U-1.  $2210 - 1770$  ----- 1= \_\_\_\_\_

23U-2.  $13 + 14 - 10$  ----- 2= \_\_\_\_\_

23U-3.  $562 + 920 - 302$  ----- 3= \_\_\_\_\_

23U-4.  $28 - 45 - 13 + 39$  ----- 4= \_\_\_\_\_

23U-5.  $49 + 17 - 68 - 48$  ----- 5= \_\_\_\_\_

23U-6.  $53.2 + 239 - 294 - 276 + 400$  ----- 6= \_\_\_\_\_

23U-7.  $(2.16 - 1.9) + (0.887 - 0.774 - 4.23)$  ----- 7= \_\_\_\_\_

23U-8.  $(2.13 + \pi - 2.01) - (1.9 + 2.54)$  ----- 8= \_\_\_\_\_

23U-9.  $114 \times 430 \times 247$  ----- 9= \_\_\_\_\_

23U-10.  $147 \times 1490 \times 1780 \times 246$  ----- 10= \_\_\_\_\_

23U-11. What is the quotient of 3.14 and e? ----- 11= \_\_\_\_\_

23U-12. The Artemis Project plans to place humans back on the moon in 2025, the first time since 1972. The Artemis Project will cost 93 billion dollars. Two astronauts will be on the surface of the moon for 6.5 days. What is the cost per second per astronaut to be on the surface of the moon? ----- 12=\$ \_\_\_\_\_

23U-13. How many hours are there in the year 2023? ----- 13= \_\_\_\_\_ hrs (integer)

23U-14.  $(82)[65 \times 79/110]$  ----- 14= \_\_\_\_\_

23U-15.  $(-98/403)[438 - 247]$  ----- 15= \_\_\_\_\_

23U-16.  $\{(308)(220 - 197)(299)\} - 8.81 \times 10^5$  ----- 16= \_\_\_\_\_

23U-17.  $(270 + 393)[76 - 188 - 68]$  ----- 17= \_\_\_\_\_

23U-18.  $\left[ \frac{101 + 455}{63/341} \right] \left[ \frac{0.0234}{0.0119} \right]$  ----- 18= \_\_\_\_\_

23U-19.  $\frac{(61/334) + (504/305)}{(666 - 615)}$  ----- 19= \_\_\_\_\_

23U-20.  $\frac{(\pi)(35/20)(12/43)}{322}$  ----- 20= \_\_\_\_\_

23U-21.  $\frac{214}{(144 - 92)} - \frac{(32 - 179)}{110}$  ----- 21= \_\_\_\_\_

23U-22.  $\left[ \frac{2600 + 1220}{1520 - 963} \right] \left[ \frac{1480}{2280} \right]$  ----- 22= \_\_\_\_\_

23U-23.  $\frac{[-(1340 + 535)(1640 - 719)]}{(0.0057/(3.53))}$  ----- 23= \_\_\_\_\_

23U-24. Donna and Vanna wanted to buy as many cans of Play-Do as possible. If the cans are 6 for \$2 and they have \$25, how many cans can they purchase tax free? ----- 24= \_\_\_\_\_ (integer)

23U-25. Amber jogged for 75 minutes averaging 6 mph and then she walked 2 hours at 3 mph. How far did she travel? ----- 25= \_\_\_\_\_ miles

23U-26. How many seconds are there from noon Wednesday to Friday evening at 6:15 pm the same week? ----- 26= \_\_\_\_\_ (integer)

23U-27.  $\frac{(1.48 \times 10^9) + (6.02 \times 10^9)}{(-0.0362)(0.0568) - 0.00198}$  ----- 27= \_\_\_\_\_

23U-28.  $(10.1)[(0.00566/0.00877)(23 + 45.6)]$  ----- 28= \_\_\_\_\_

23U-29.  $\frac{(0.163 + 0.714)(0.022 + 0.0136)}{(4.14 \times 10^{12})}$  ----- 29= \_\_\_\_\_

23U-30.  $(70.4)[(9.29 \times 10^{11}) - (9.26 \times 10^{11})]$  ----- 30= \_\_\_\_\_

23U-31.  $\frac{1}{0.271} + \frac{1}{(\pi)(0.211 - 0.105)}$  ----- 31= \_\_\_\_\_

23U-32.  $\frac{1}{-0.247} + \frac{1}{(0.356 - 0.95)}$  ----- 32= \_\_\_\_\_

23U-33.  $\left[\frac{1/2270}{1/3020}\right][1.80 \times 10^5]$  ----- 33= \_\_\_\_\_

23U-34.  $\frac{1}{185} - \frac{1}{(233 + 273)}$  ----- 34= \_\_\_\_\_

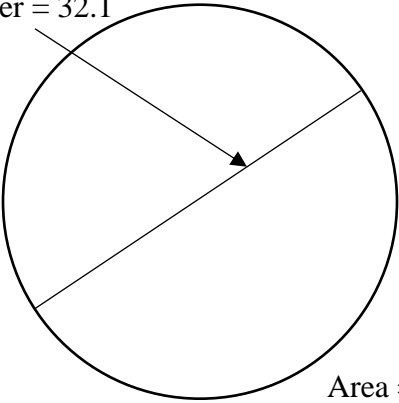

23U-35. If thirty-three thousand is divided by nineteen, what is the remainder? ----- 35= \_\_\_\_\_ integer

23U-36. If a vertical meterstick casts a 25-cm shadow at the same time a nearby tower casts a 60-meter shadow, how tall is the tower? ----- 36= \_\_\_\_\_ m

## LISTENING SKILLS - GRADES 5/6

### *Audie Murphy: The most decorated soldier of World War II*

"No son, I'm sorry, you're just too young," said the recruiter, as the young man, almost in tears, turned away and headed for the door. Then, the gruff sergeant, as if to add insult to injury, added, "oh, and you're also too short!", as the boy slammed the door behind him. It was strike three for the day. The United States Marines, the United States Navy, and, now, the United States Army were all in agreement. None of them had any place for the young farmer Audie Murphy.

1:00 He glanced down the cold, dusty street in both directions. Everywhere he looked Greenville, Texas was abuzz with the biggest news Audie could remember. On December 7, 1941, the empire of Japan had recently attacked the U.S. naval base at Pearl Harbor in the far United States territory of Hawaii. The next day, Murphy had listened to President Franklin D. Roosevelt speak to a joint session of the United States Congress, proclaiming it, "a day which will live infamy..." He then went on to ask that the legislative branch vote for a declaration of war against Japan, with the Congress most readily complying. Four days later, Germany declared war on the United States, with the United States immediately reciprocating the measure. The United States was now a full combatant in the second world war of the 20th Century.

Almost immediately, thousands of young men headed to the nearest armed forces' recruiters. At the time, there were three choices: Navy, Marines, or Army. The Air Force was then still part of the Army, then called the Army Air Corps. Murphy chose the Army.

2:00 He was born on June 20, 1925 in the rural community of Kingston, in Hunt County, Texas. His parents were sharecroppers. A sharecropper doesn't own the land he farms. So, he has to give part of his crop to the land owner as rent. Being the seventh of twelve children, Audie spent much of his time as a young child picking cotton in the fields to help his family put food on the table. But the back breaking toil made him want something more glamorous. And when Pearl Harbor occurred, the sixteen year old headed to enlist.

Officially, the enlistment age in 1941 was 21. The armed services weren't terribly picky though and many men lied about their age if they looked older than they were. But the five foot, five inches, baby faced Audie quickly found that none of the services would look the other way, even if he said he was older. Not to be deterred though, he

convinced his sister to sign an affidavit, or letter swearing, that he was born in 1924, not 1925. Still not officially old enough for enlistment, that extra year seemed to satisfy the Army, where he enlisted in June of 1942.

The Army shipped him to Camp Wolters west of Fort Worth in Mineral Wells, where he completed his basic training. Then he transferred to Camp Meade in Maryland, there earning a marksman badge for rifles and an expert badge with the bayonet.

On February 20, 1943 he was shipped to French held Morocco, in northern Africa. There Great Britain and the United States were pushing the Axis powers of Germany and Italy back into Europe. Almost three months later, on May 13, the last Italian forces surrendered. Murphy's 3rd Infantry Division was dealt the  
3:00 monumental task of sorting the 275,000 new prisoners of war from both Italy and Germany. Some of the German POWs would be sent to Camp Fannin, near Tyler, Texas, only an hour's drive from Audie's hometown.

Over the next several months, the 3rd Infantry Division would move to the Mediterranean island of Sicily, pushing the Italians and Germans back to mainland Italy, where Murphy would land in September, 1943. There, while scouting positions, he and two other soldiers were ambushed, with one being killed. Murphy and the other remaining soldier fended off the attack with machine gun fire and hand grenades, killing five German soldiers. By December, Audie was promoted to Sergeant.

But as 1943 turned to 1944, he found himself in an army hospital with malaria, a blood borne disease carried by mosquitoes that produces high fever, chills, headaches, and nausea. By March he was well enough to return to his platoon near Anzio, Italy, just south of Rome. There they engaged a German tank. Murphy was able to climb near the tank, alone, and close enough to dismantle it with rifle grenades. His bravery in this action earned him a Bronze Star. A Bronze Star is an award given by the armed forces for heroism or valor.

Unfortunately though, he was soon back in the hospital, again fighting off another bout of malaria. Thankfully though this round didn't last long and he was back on patrol with his Company in no time, taking more German prisoners and also  
4:00 earning the Combat Infantryman Badge and the Bronze Oak Leaf Cluster to adorn his already awarded Bronze Star.

On June 4, 1944, the American forces would liberate Rome. Murphy would stay in the city until August. Then his platoon invaded southern France, pushing back the German army. On August 15, 1944, the group was sweeping through a vineyard when they were ambushed. Murphy grabbed a machine gun and returned fire, killing two and

wounding one. Two Germans came out of a farmhouse seemingly with the intent to surrender. But when U.S. soldiers moved to arrest them the Germans shot and killed them. The 112 pound, five foot, five inches tall platoon sergeant made a solo frontal assault on the house under enemy fire. When the dust settled, six enemies were dead, two wounded, and he'd taken eleven prisoners of war, or POWs. This earned him the Distinguished Service Cross.

5:00 A month later he was wounded in the heel, earning him the first of his Purple Hearts. A Purple Heart is a medal given for being wounded while in combat.

In January, 1945 his platoon was moved into eastern France to a region called the Colmar Pocket. Germans were stubbornly resisting the advances of the American forces. Murphy's Division was tasked with dislodging them. In the ensuing battle, the Germans destroyed an American M10 tank destroyer. He ordered his troops to retreat away from the destroyer, while staying with the burning hulk. While still being fired upon by the enemy, he climbed aboard and used its still functional 50 caliber machine gun on the advancing German soldiers, killing an entire squad. The battle between the one American soldier and what seemed like countless enemies lasted for over an hour, only ending when Audie ran out of ammunition. He retreated and rejoined his men, then leading them back to his original position at the tank destroyer, continuing and winning the fight. This bravery earned him the Medal of Honor, America's most distinguished medal for bravery on a battlefield. He was also promoted to First Lieutenant.

At this point, his star was growing within the Army and back home. He was removed from the front lines and began work at this regimental headquarters, where he would stay until European Operations of the war ended in June, 1945.

6:00 The Army sent him back home to Texas with a thirty day leave. By this point he was a full blown celebrity. It seemed everywhere he traveled he was regaled with parades and celebrations in his honor. On the outside everything seemed great. But years of fighting in some of the most hostile conditions ever seen began to take its toll on him mentally. He would eventually be diagnosed with what was then called "battle fatigue" or "shell shock". Today we know it as posttraumatic stress disorder, or PTSD.

Thankfully, he was able to alleviate the tension through several outlets. He began writing poetry at first, and then a full memoir of his time in the war titled *To Hell and Back*. It was during this time that his celebrity persona preceded him. James Cagney, a famous actor at the time, saw an article about Murphy in *Life* magazine and invited

him to Hollywood. It wasn't long before he was starring in movies, with his first role in 1950 playing Billy the Kid. His acting career grew steadily and in 1955 he  
7:00 starred as himself in the film adaptation of his memoir, *To Hell and Back*. Throughout the next decade he would go on to star in at least 28 movies.

Even after becoming a successful actor though, old habits die hard. And with the outbreak of the Korean War on June 25, 1950, Murphy returned to active duty in the military. This time though he joined his home state's Army National Guard as a Captain, training new recruits of the 36th Infantry Division. He would be active and inactive several times until 1969, finally leaving the military for good.

Two years later on May 28, 1971 Audie climbed into a small, twin engined airplane with the pilot and four other passengers. The aircraft taxied down the runway and lifted off the ground into gray, rain filled skies near Atlanta, Georgia. Almost three hours later, with weather conditions worsening, the plane crashed into Brushy Mountain very near the Appalachian Trail close to the city of Roanoke, Virginia, killing all on board.

Murphy was buried with military honors at Arlington National Cemetery across the Potomac River from Washington D.C. Texas resident, current United Nations Ambassador, and future United States President George H.W. Bush was in attendance. Cemetery rules allow Medal of Honor recipients a special headstone. Years before though, he had declined the honor, instead choosing the standard issue grave marker.

8:00 Besides his headstone, today Audie Murphy's name can be found in many places, from a Veterans' Administration Hospital in San Antonio, Texas to a star on the Hollywood Walk of Fame!

## LISTENING SKILLS - GRADES 7/8

### "The Fall of the Aztecs"

1. \_\_\_\_\_ ruled the area, that would later be called Spain, for 800 years.
  - A. Cossacks
  - B. Moors
  - C. Jews
  - D. Buddhists
2. The Spanish departure from Tenochtitlan was noticed by an elite guard of Aztec warriors called the \_\_\_\_\_.
  - A. Hawk Fighters
  - B. Osprey Warlords
  - C. Falcon Soldiers
  - D. Eagle Warriors
3. Upon his return to Tenochtitlan, Cortes decided to build brigantines, a type of two-masted \_\_\_\_\_, to assault the city .
  - A. ships
  - B. planes
  - C. bridges
  - D. horses
4. The night the Spanish were forced from Tenochtitlan is known as La Noche Triste, or the \_\_\_\_\_.
  - A. Night of Sorrows
  - B. Spanish Darkness
  - C. Aztec Assault
  - D. Watery Grave
5. Christopher Columbus sailed under the Spanish flag, but he was born in \_\_\_\_\_.
  - A. Portugal
  - B. Andorra
  - C. Italy
  - D. France
6. The Islamic invaders that ruled the Iberian Peninsula for 800 years surrendered their last fortress, Alhambra, in the city of \_\_\_\_\_.
  - A. Madrid
  - B. Granada
  - C. Seville
  - D. Paris
7. Today, the island known as Hispaniola is shared by the countries of \_\_\_\_\_ and \_\_\_\_\_.
  - A. France and England
  - B. Russia and Germany
  - C. Haiti and the Dominican Republic
  - D. Italy and Spain

8. The original name the Aztecs called themselves is where the modern name of \_\_\_\_\_ originates.
- A. Spain
  - B. England
  - C. Columbia
  - D. Mexico
9. Once the new world was discovered, the Spanish forgot about a new route to Asia and began a search for \_\_\_\_\_.
- A. lumber
  - B. gold
  - C. salt
  - D. horses
10. \_\_\_\_\_ was the name of the woman Cortes married.
- A. La Malinche
  - B. El Bordo
  - C. La Mujer
  - D. La Chica
11. Cortes met a Franciscan priest when he first landed on the \_\_\_\_\_.
- A. Korean peninsula
  - B. Yucatan peninsula
  - C. Florida peninsula
  - D. Baja peninsula
12. The wife of Cortes was given to him after his conquistadors overran a group of natives in the present day Mexican state of \_\_\_\_\_.
- A. Chiapas
  - B. Tabasco
  - C. Coahuila
  - D. Puebla
13. The city of \_\_\_\_\_ was founded by Cortes.
- A. Matamoros
  - B. Chihuahua
  - C. Cancun
  - D. Veracruz
14. A \_\_\_\_\_ reaches heights of over 17,000 feet to the east of present day Mexico City.
- A. Cortes monument
  - B. pyramid
  - C. volcano
  - D. communications tower
15. The main temple in Tenochtitlan was called the \_\_\_\_\_.
- A. Templo Mayor
  - B. Plaza de la Reforma
  - C. Hall of Justice
  - D. Bella Artes

16. Moctezuma initially refused to meet Cortes, but changed his mind after Cortes

\_\_\_\_\_.

- A. became a priest in Tenochtitlan
- B. asked the King of Spain to request a meeting with Moctezuma
- C. massacred nobility and burned the city of Cholula
- D. became the mayor of Cuba

17. After the Spanish were forced from Tenochtitlan, they gained reinforcements from

\_\_\_\_\_.

- A. France
- B. Cuba
- C. Morocco
- D. Germany

18. \_\_\_\_\_ and \_\_\_\_\_ combined their kingdoms to form the country of Spain.

- A. King Charles and Queen Victoria
- B. King Philip and Queen Anne
- C. King Henry and Queen Elizabeth
- D. King Ferdinand and Queen Isabella

### **True/False**

19. Cortes' wife spoke Mayan.

20. Cortes' army arrived in the valley of Mexico on November 8, 1519.

21. Some accounts say Moctezuma was stoned to death by the Spanish.

22. Modern day Mexico City has a population over 22,000,000.

23. Lake Texcoco surrounded a vast city of the Aztecs.

24. Hernan Cortes was born in the city of Barcelona.

25. Christopher Columbus left Spain in search of a new route to India to trade spices.

## LISTENING SKILLS - GRADES 7/8

### The Fall of the Aztecs

The leather shoe splashed into the brown, wet, sand as the man jumped from the small rowboat with several other men and headed ashore. The group of Spaniards waded several yards to dry land. The man, Hernan Cortes, was the leader of the third wave in three years to come ashore on what would become the country of Mexico. His retinue consisted of eleven ships that housed approximately 500 men while also carrying thirteen horses and fourteen cannon. The men had sailed west from the settlement of Cuba, founded eight years earlier in 1511.

1:00 To Cortes, this new world seemed to be another planet, especially considering his path to get to that spot. He was born in 1485 in the city of Medellin on the Iberian Peninsula in Europe. At that time, the country of Spain didn't exist. His hometown was then a part of an area known as the Kingdom of Castille. Not long after his birth, in 1492, two major events occurred that would change the course of the western hemisphere. First, the Moors surrendered their last fortress, the Alhambra, in the city of Granada, ending almost 800 years of ruling over the future Spain. When this happened Queen Isabella of Castille and King Ferdinand of Aragon decided to combine their kingdoms, effectively creating the country we know today as Spain.

The Moors, Islamic conquerors from Africa, had ruled the people of the peninsula for almost 800 years. Once that yoke was shed, the new country of Spain wanted to expand its borders and spread its own religion of Christianity. The same year of their liberation, the ruling duo commissioned Christopher Columbus, an Italian explorer, to fly the new Spanish flag as it sailed across the Atlantic Ocean in search of an undiscovered route to India. But, while failing in that endeavor, he initiated the first European contact with the continents we know now as North and South America, and its original inhabitants, of which there were millions.

2:00 Geography quickly dashed the drive for a quicker way to trade spices with Asia. But, the Spaniards found a much better item in this new land to plunder, gold. Columbus had first landed on one of the islands in the Bahamas. But Spanish settlements soon moved more westerly into the Caribbean, conquering the island we now know as Hispaniola. Today, the countries of

Haiti and the Dominican Republic share this island. It was here, in 1504, that Cortes came to the new world.

Over the next fifteen years Cortes maneuvered his way through the political ranks in the Spanish society of the new world, and by February 1519 was standing on the mainland of North America, ready to colonize and explore the area.

He first landed on the Yucatan peninsula where he found a Franciscan priest from Spain who had been shipwrecked and spent time as a captive of the Mayan peoples, where he learned their language. Cortes quickly enlisted him as an interpreter. He then moved north along the western Gulf of Mexico coastline. His group of conquistadors were now in the present Mexican state of Tabasco when they engaged a hostile group of natives. The indigenous people were quickly overrun. In tribute to the new invaders, the vanquished gave Cortes a group of twenty young women. Cortes immediately converted them to Christianity, and, rather rashly, married one of them. At first his intentions with this marriage were unclear, but the woman, known to history as La Malinche, knew several languages, one of them being Mayan, the same language as the shipwrecked Franciscan priest. The other was Nahuatl, a language used by groups to the north.

As they traveled that direction, word filtered to them of a powerful nation-state ruled by a leader named Moctezuma. Unbeknownst to the Spaniards, word had also filtered to Moctezuma that new, strangely dressed men, had come from the east and were traveling in their lands. Today we know the people of this kingdom as Aztecs. They called themselves Culhua-Mexica. This is where the modern name of Mexico originates.

Cortes moved on up the coast and founded the present day city of Veracruz before turning inland. The foresight of Cortes began to shine. He needed to speak to Moctezuma through emissaries. So he would speak to the priest in Spanish, then the priest would speak to La Malinche in Mayan, who would then translate it into Nahuatl to the Aztecs. Through this chain of communication, he asked to be received by Moctezuma in the capital of Tenochtitlan, almost 200 miles inland. Moctezuma, convinced the invaders weren't peaceful, refused. Cortes, not to be deterred, moved inland. As he traveled he met different groups of people, some who were allied with the Aztecs and some who weren't. He persuaded those hostile to the Aztecs to ally with the Spaniards and march to Tenochtitlan, along the way fighting and winning a three-day battle. When he and his 1000-strong native army entered the city of Cholula, he massacred the nobility and burned the city. Cortes was now a force to be reckoned with by Moctezuma.

Moctezuma was no rookie when it came to warfare. He had spent years of his life prior to the arrival of the Spanish conquering lands in central Mexico, once raising an army of 400,000 men and subjugating several areas in the region. By 1519, the leader of the Aztecs had fought in 73 battles and won 43 of them. His kingdom was over 80,000 square miles and ruled five to six million people.

5:00

On November 8, 1519, Cortes' army crested a hill and looked down on the grand sight of the valley of Mexico. Before him, at an elevation of approximately 7,300 feet, was a valley ringed by mountains on all sides, with a snow-capped volcano reaching to heights of over 17,000 feet to the east. In the valley floor was a large lake, Lake Texcoco. Within the lake were several islands. On one of the islands was a vast city the Aztecs called Tenochtitlan. To reach the island, the inhabitants had constructed great bridges, or causeways, to reach the city. The Spaniards looked in amazement. Upon their arrival, they estimated the population of Tenochtitlan to be 200,000 people, rivaling many of the largest cities in contemporary Europe.

At this point, Moctezuma realized the invaders would not be dissuaded. Outright warfare wouldn't stop them. So, he changed tack and welcomed them with open arms into the city. Unfortunately, if his intentions were to appease them until they left, his next action would never make them want to leave. He lavished them with gold gifts, further whipping their imaginations into a frenzy.

6:00

Conditions seemed to fester. The Aztecs weren't happy with their invaders. When news arrived from the coast that Spaniards had been killed by Aztecs in that area, Cortes decided to take Moctezuma prisoner in his own palace. He forced the ruler to decree actions to his subjects in an attempt to control the masses. But, unfortunately, events turned violent when one of Cortes' subordinates named Pedro de Alvarado, ordered the massacre of several elites during a ceremony at the Templo Mayor, the main temple in Tenochtitlan. This, coupled with the previous arrest of Moctezuma, forced the Aztecs into full scale warfare.

In the melee, Moctezuma was killed. Accounts differ on who killed him though, with some saying he was stoned to death by the Aztecs for allowing the Spaniards to commit such atrocities, while others say he was strangled or stabbed by the Spanish for failing to control the native population.

7:00

Cortes realized he had overplayed his hand. He asked the remaining Aztec leaders for a cease-fire of one week, saying he would return all gifts given to any Spaniard during

that time. In return he asked for safe passage out of the city. Of course, the conquistador had no intention of honoring his end of the deal. It was a stalling tactic, allowing the men time to prepare to leave the city.

Much of the bridge leading to the city had been destroyed by the Aztecs. So the Spanish devised a temporary, portable, bridge to use as they departed. Cortes also told all men to carry as much gold with them as possible. They departed into the night on July 1, 1520, quietly moving towards the mainland. It wasn't long before their movements were noticed by the elite guard of Aztecs, the Eagle Warriors. What ensued was a fierce, running battle that would last most of the night. In the end, Cortes would be wounded, but not fatally. He would claim 154 Spaniards were killed  
8:00 once the retreat concluded. By morning, all Spaniards were forced from the city, a huge loss to Cortes. The night is known to history as La Noche Triste, or the Night of Sorrows.

But if Hernan Cortes was anything, he was indefatigable. In no time he was planning his return. Reinforcements from Cuba began arriving. With these he moved back towards Tenochtitlan, defeating many of the Aztec allies. Then he laid siege to the city by cutting off supplies.

The lack of bridges leading to the island-city was still a problem though. The amount of losses during La Noche Triste showed that portable bridges weren't the most practical way to cross the water. When they returned to the lake shores, he decided to construct brigantines, a type of two-masted ship, to assault the city. The Aztecs proved no match for the siege and ships. They were soon overrun. By the end of the battle, the city was destroyed.

It would be another full year when, on August 13, 1521, the last Aztec ruler Cuauhtemoc was captured. Tenochtitlan and all of the Aztec empire was now under full Spanish control, paving the way for the modern country we know as  
9:00 Mexico.

Today almost all of the lake is gone, drained by the Spanish. In its place is the metropolitan behemoth of Mexico City with over 22,000,000 people within the metro area.

- A. Texas A&M University
  - B. University of Houston
  - C. University of Texas
  - D. Texas Tech University
34. Which two degrees had the same percentage of graduates at Texas Tech University?
- A. Architecture and Engineering
  - B. Fine arts and Geosciences
  - C. Business and Education
  - D. Liberal arts and Natural sciences
35. Which university had the highest percentage of Architecture graduates?
- A. Texas A&M University
  - B. University of Houston
  - C. University of Texas
  - D. Texas Tech University
36. Which two colleges awarded the same percentage of Fine Art degrees?
- A. Texas A&M University and University of Houston
  - B. University of Texas and Texas Tech University
  - C. Texas A&M University and Texas Tech University
  - D. None
37. The percentage of Geosciences graduates was the smallest at which college?
- A. Texas A&M University
  - B. University of Houston
  - C. University of Texas
  - D. Texas Tech University
38. Which college had the largest total percentage of Bachelor of Arts degrees?
- A. Texas A&M University
  - B. University of Houston
  - C. University of Texas
  - D. Texas Tech University
39. Which degree had the most graduates at Texas A&M University?
- A. Business
  - B. Pre-med
  - C. Education
  - D. Engineering
40. Architecture and Engineering combined had more graduates than Pre-med and Nursing combined at two which universities?
- A. Texas A&M University and University of Houston
  - B. University of Houston and University of Texas
  - C. University of Texas and Texas A&M University
  - D. Texas Tech University and University of Texas

### TRUE / FALSE

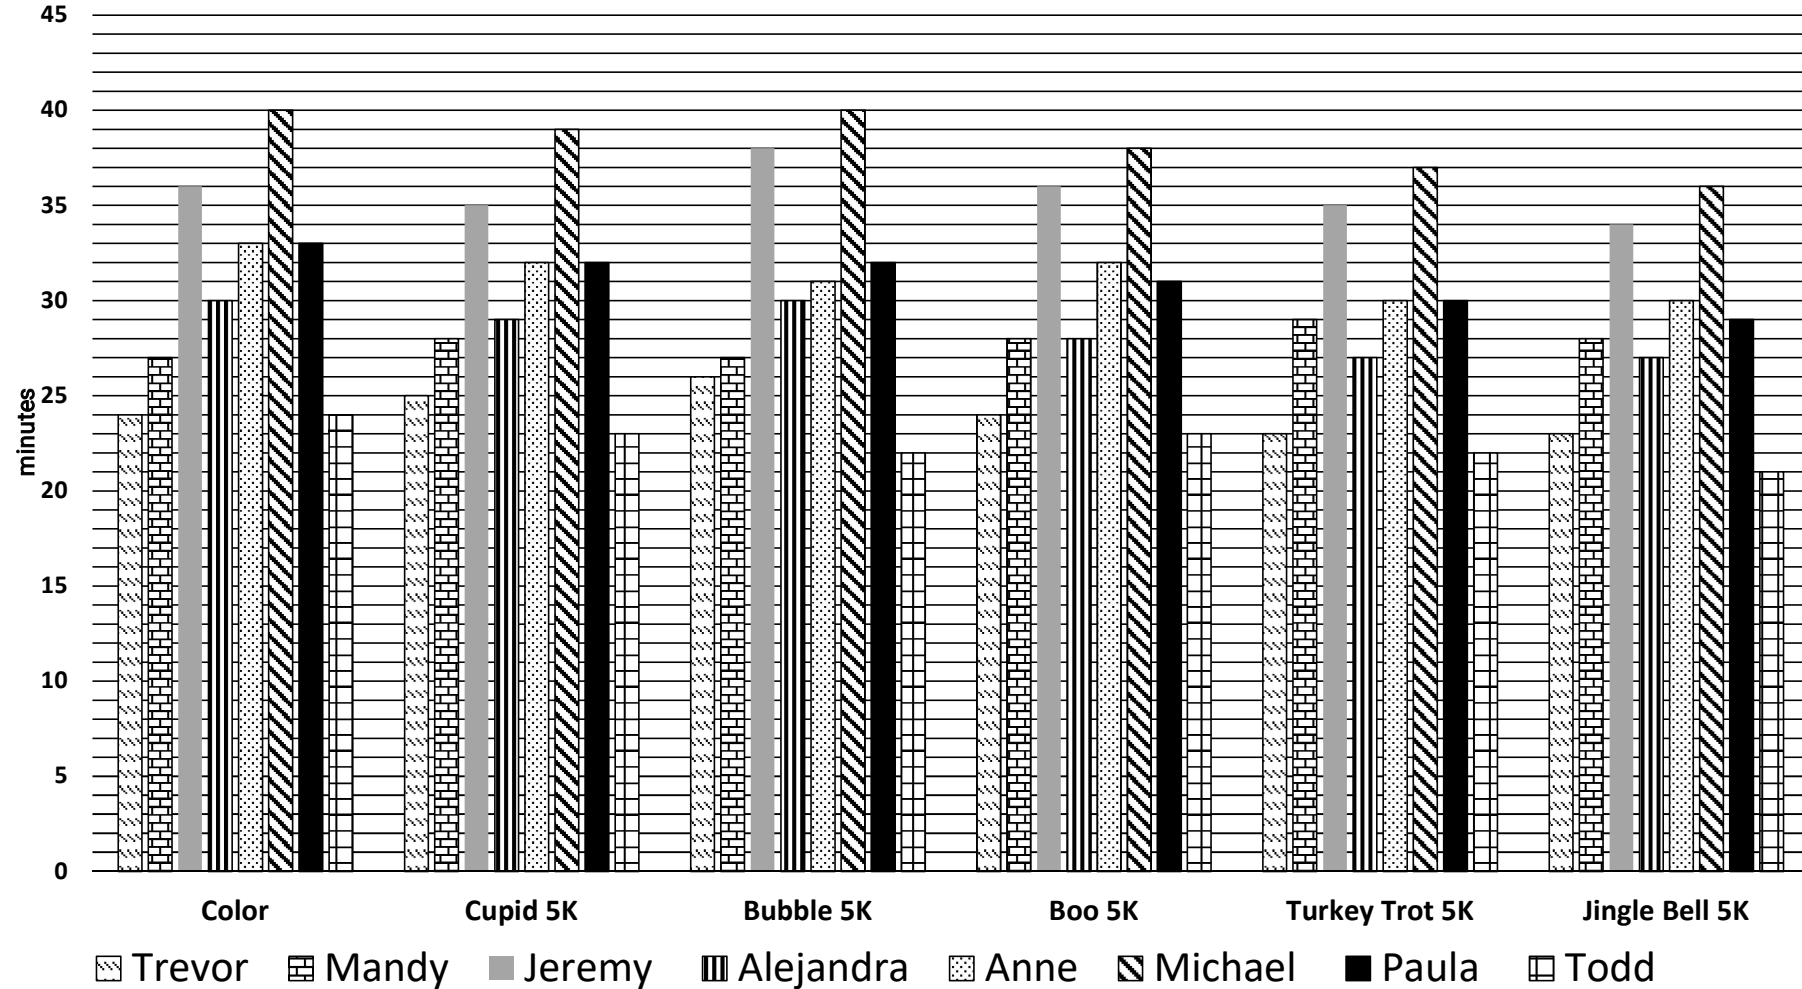

41. University of Houston and Texas A&M University had the same combined percentage of Geosciences and Education graduates.
42. The University of Texas had the highest percentage of graduates with degrees in the Other category.
43. Education is a Bachelor of Arts degree.
44. University of Houston had a higher percentage of Business graduates than Texas Tech.
45. The percentages of graduates are based on May 2018 graduates.

## South America Maps

46. Which country's capital city is Lima?  
A. Peru  
B. Colombia  
C. Venezuela  
D. Ecuador
47. Which country's capital city is located nearest to the Tropic of Cancer?  
A. Ecuador  
B. Paraguay  
C. Bolivia  
D. Brazil
48. Which of the following cities has the largest population?  
A. Goiania  
B. Palmas  
C. San Justo  
D. Cusco
49. What is the approximate distance between Cusco and Iquitos?  
A. 600 miles  
B. 675 miles  
C. 725 miles  
D. 750 miles
50. Which country's climate is predominately savanna?  
A. Peru  
B. Suriname  
C. Venezuela  
D. Colombia
51. Which country has no natural resources or metals shown?  
A. Argentina  
B. Suriname  
C. Uruguay  
D. Chile
52. Which country has Portuguese as its official language?  
A. Colombia  
B. Chile  
C. Bolivia  
D. Brazil
53. Which river connects Santarem and Itacoatiara?  
A. Amazon River  
B. Parana River  
C. Araguaia River  
D. Sao Francisco River
54. Which country has a very dry climate with low levels of rainfall in its northern region but high levels of rainfall in its southern region?  
A. Chile  
B. Colombia  
C. Brazil  
D. Argentina
55. What is the approximate distance between the capital city of Chile and the city of Punta Arenas?  
A. 1250 miles  
B. 1350 miles  
C. 1450 miles  
D. 1500 miles
56. Which of the following waterways is located nearest to Cape Horn?  
A. Beagle Channel  
B. Strait of Magellan  
C. Corcovado Gulf  
D. Rio de la Plata
57. Which South American country has the highest life expectancy for men?  
A. Bolivia  
B. Chile  
C. Suriname  
D. Guyana
58. Which of the following cities has the smallest population?  
A. Bucaramanga  
B. Cali  
C. Guayaquil  
D. Pereira
59. Which of the following crops are grown at the tierra fria altitude?  
A. Cacao  
B. Barley  
C. Coffee  
D. Corn
60. Which of the following cities is located inside Argentina?  
A. Talca  
B. Tarija  
C. San Juan  
D. Santa Maria

# 5K Times in 2021

A 5K is a race over a 3.1 mile course.

Races were in January, February, March, October, November, and December, respectively.

## 5K Times

61. Which race was the first after summertime?
- A. Cupid
  - B. Bubble
  - C. Boo
  - D. Turkey Trot
62. Who ran the fastest at the Jingle Bell 5K?
- A. Trevor
  - B. Alejandra
  - C. Paula
  - D. Todd
63. On average, which race had the fastest times?
- A. Color
  - B. Boo
  - C. Turkey Trot
  - D. Jingle Bell
64. Which of the following races had the fastest time for Mandy?
- A. Cupid
  - B. Bubble
  - C. Boo
  - D. Jingle Bell
65. Who had the slowest time at the Bubble Run?
- A. Jeremy
  - B. Anne
  - C. Michael
  - D. Paula
66. Which of the following ran the Cupid race faster than Alejandra?
- A. Jeremy
  - B. Mandy
  - C. Anne
  - D. Paula
67. In which race did Anne and Paula have the same time?
- A. Color
  - B. Bubble
  - C. Boo
  - D. Jingle Bell
68. Whose time got slower from the Color to the Cupid run?
- A. Trevor
  - B. Jeremy
  - C. Anne
  - D. Michael
69. In what year were these races run?
- A. 2019
  - B. 2020
  - C. 2021
  - D. 2022
70. In which race did Jeremy run the slowest?
- A. Color
  - B. Bubble
  - C. Boo
  - D. Jingle Bell
- TRUE / FALSE**
71. There are six races and eight different runners included on the graph.
72. Anne was slower than Paula at the Bubble Run.
73. Todd was faster than Trevor at the Boo 5K.
74. A 5K race is 3.2 miles.
75. Alejandra had a slower time than Mandy at each race.

  - Afghanistan
  - Russia

# Cactus Park and Recreation

**Thick black line - bicycle track, 10 miles**  
**Thin gray line - running track, 3.1 miles**  
**Dashed line - Llama River**  
**Straight lines around the park are streets**

- The park and track are open every day of the week from dawn to dusk.
- Park is closed from 11 P.M. to 5 A.M.
- Each bridge at the crossings of the river and track has benches and water fountains.
- Basketball courts located at each circle. Tennis courts at each square.
- Locally run kiosks located at each rectangle. Stores do not keep cash on hand.
- Rest pavilion, vending machines, and restrooms located at each triangle.
- Bird watching is suggested at the location of trees on the map.
- Trash cans are located every half mile on both tracks.
- Private events at running track upon availability, call 555-555-5555 to reserve.
- Use the park at your own risk. For all emergencies, call 911.

- Bicycle track is for bikes, inline skates, or skateboards. Helmets are required.
- Running track does not allow bikes, skates, or skateboards.
- Dogs are only allowed at the dog park. The owner must collect dog poop and discard it in trash cans.
- All directions on tracks are clockwise. Fast traffic stay to the left and slow traffic to the right.

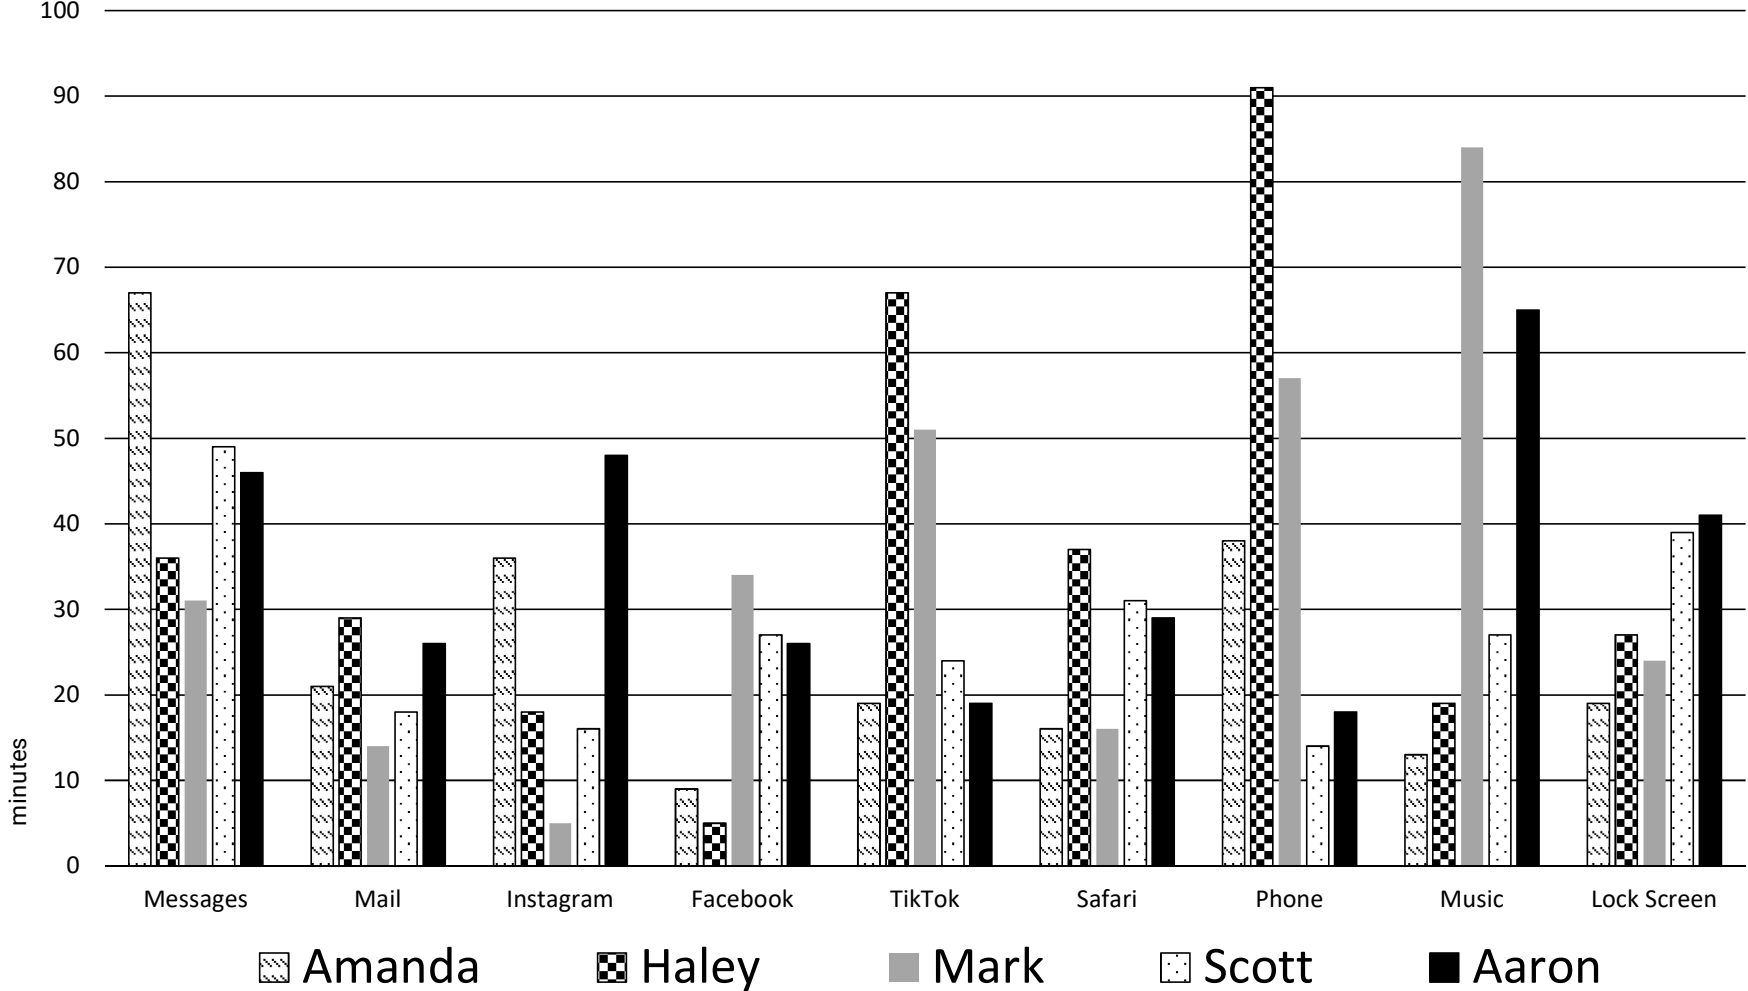

## Cactus Park and Recreation

16. How often are trash cans located on the pathways?
- A. Every 1/2 mile
  - B. Every 1 mile
  - C. Every 2 miles
  - D. Only at a pavilion
17. Where would you find people roller skating at the park?
- A. Bicycle track
  - B. Running track
  - C. Dog Park
  - D. Bicycle and Running track
18. What street has the closest parking lot to the running track?
- A. Martin Road
  - B. Aiden Road
  - C. Parker Street
  - D. Marie Street
19. What shape represents the basketball courts?
- A. triangle
  - B. circle
  - C. square
  - D. rectangle
20. How many bridges cross the Llama River on the bicycle track?
- A. 3
  - B. 4
  - C. 5
  - D. 6
21. What street has the closest parking lot to the dog park?
- A. Martin Road
  - B. Aiden Road
  - C. Parker Street
  - D. Marie Street
22. What is located at each bridge crossing?
- A. Restrooms
  - B. Pavilions
  - C. Parking lots
  - D. Benches and water fountains
23. What street has the closest parking lot to a bird watching area?
- A. Martin Road
  - B. Aiden Road
  - C. Parker Street
  - D. Marie Street
24. Which of the following is true?
- A. Bicycle track is 3.1 miles
  - B. Faster traffic on pathways should stay to the left
  - C. Tracks run clockwise
  - D. Helmets are not required for skateboarding
25. What shape represents where a person would find restrooms?
- A. triangle
  - B. circle
  - C. square
  - D. rectangle
- TRUE / FALSE**
26. Both kiosk areas are located on the eastern side of the map.
27. Only one bird watching site has a pavilion.
28. The park is open to the public 5 A.M. to 11 P.M.
29. Private events can only be at the running track.
30. The bicycle track is exactly two times the length of the running track.

# Average time per day spent on phone apps

Average based on August 2022

Social media apps include Instagram, Facebook, and TikTok.

## Average time on phone apps

31. Which person uses social media apps the least?
- A. Haley
  - B. Mark
  - C. Scott
  - D. Aaron
32. Which person uses their music app more than the messages app?
- A. Amanda
  - B. Haley
  - C. Scott
  - D. Aaron
33. Which app does Haley use most?
- A. Tiktok
  - B. Safari
  - C. Phone
  - D. Lock screen
34. Which two apps are used most by Amanda?
- A. Messages and Phone
  - B. Mail and Safari
  - C. Instagram and Phone
  - D. Messages and Instagram
35. Amanda and Mark use which app the same amount?
- A. Mail
  - B. Facebook
  - C. Safari
  - D. Music
36. Which app does Scott use the least?
- A. Mail
  - B. Instagram
  - C. Safari
  - D. Phone
37. Which person uses apps for the most amount of total time?
- A. Amanda
  - B. Haley
  - C. Scott
  - D. Mark
38. Which app has the lowest amount of use on average ?
- A. Messages
  - B. Facebook
  - C. Instagram
  - D. Safari
39. Which person uses mail and messages combined the most?
- A. Haley
  - B. Amanda
  - C. Scott
  - D. Aaron
40. Which person has their phone locked most?
- A. Haley
  - B. Mark
  - C. Scott
  - D. Aaron
- TRUE / FALSE**
41. There is an average time spent on nine apps from August 2021 for five people.
42. Aaron uses messages more than Haley.
43. Mark uses mail more than messages.
44. Instagram is the most used social media app by Aaron.
45. Scott uses Safari more than any of the social media apps.

**PAGE IS INTENTIONALLY BLANK**

## Australia and Oceania Maps

46. Which of the following islands is located along the Tropic of Capricorn?
- Necker Island
  - Tubuai Island
  - Pitcairn Island
  - Baker Island
47. Which atoll is located within the Federated States of Micronesia?
- Ujelang Atoll
  - Ontong Java Atoll
  - Abemama Atoll
  - Ngatik Atoll
48. Which of the following countries has the capital city of Tarawa?
- Kiribati
  - Tonga
  - New Zealand
  - Palau
49. What climate type is found in eastern Australia?
- Desert
  - Mediterranean
  - Humid subtropical
  - Savanna
50. Which of the following metals is found on the island of New Caledonia?
- Nickel
  - Copper
  - Gold
  - Lead
51. What is the capital city of the Northern Territory in Australia?
- Perth
  - Darwin
  - Adelaide
  - Brisbane
52. Which of the following cities has the largest population?
- Jayapura
  - Merauke
  - Palu
  - Banjarmasin
53. What is the approximate distance between Melekeok and Palikir?
- 1500 miles
  - 1550 miles
  - 1625 miles
  - 1700 miles
54. \_\_\_\_\_ is the predominant method of land use for Queensland.
- Commercial farming
  - Subsistence farming
  - Urban
  - Ranching or herding
55. What is the approximate distance between the capital cities of Fiji and Tuvalu?
- 600 miles
  - 700 miles
  - 800 miles
  - 900 miles
56. The Barkly Tableland is located in which Australian territory?
- Western Australia
  - Northern Territory
  - South Australia
  - Victoria
57. Which of the following countries has the shortest life expectancy for females?
- Nauru
  - New Zealand
  - Australia
  - French Polynesia
58. Which of the following cities has the smallest population?
- Hobart
  - Wollongong
  - Fremantle
  - Mackay
59. English is NOT an official language of \_\_\_\_\_.
- Solomon Island
  - New Zealand
  - Micronesia
  - Papua New Guinea
60. Which island is located around the Solomon Sea?
- New Caledonia
  - Tasmania
  - Espirtu Santo
  - New Britain

# AVERAGE ITEMS SOLD BY EACH EMPLOYEE PER MONTH

Averages are based on all sales in 2018.

## AVERAGE ITEMS SOLD BY EACH EMPLOYEE PER MONTH

61. Bruce sold more televisions than which other employee?
- A. Steve
  - B. Natasha
  - C. Carol
  - D. Wanda
62. Tony sold the most of which category?
- A. Appliances
  - B. Video games
  - C. Smartphones
  - D. Stereos
63. Wanda sold the same amount of laptops as \_\_\_\_.
- A. Steve
  - B. Tony
  - C. Donald
  - D. Clint
64. Which employee sold the most smartphones and stereos combined?
- A. Bruce
  - B. Carol
  - C. Donald
  - D. Clint
65. Which employee sold the least amount of laptops?
- A. Bruce
  - B. Natasha
  - C. Tony
  - D. Carol
66. Which item was sold the most on average by all employees shown?
- A. Misc/Other
  - B. Video games
  - C. Appliances
  - D. Laptops
67. Clint had the highest average sales of any employee for which of the following categories?
- A. Stereos
  - B. Misc/Other
  - C. Smartphones
  - D. Video Games
68. Which of the following employees sold the most televisions?
- A. Carol
  - B. Donald
  - C. Natasha
  - D. Wanda
69. Which two employees sold the most video games?
- A. Steve and Tony
  - B. Bruce and Carol
  - C. Natasha and Bruce
  - D. Donald and Carol
70. Bruce sold more \_\_\_\_ than Carol.
- A. Televisions
  - B. Appliances
  - C. Smartphones
  - D. Laptops
- TRUE / FALSE**
71. Video games were sold more often than appliances.
72. Donald sold more smartphones than Wanda.
73. Tony sold more televisions than Bruce.
74. There are seven different employees on the chart.
75. Steve and Clint sold the least video games.

**MATHEMATICS**

**DO NOT OPEN TEST UNTIL TOLD TO DO SO**

## 2022-2023 Middle School Virtual Challenge Meet #3 - Mathematics Test

- (1) Evaluate:  $(4)^{-3} \times 2^9$
- (A) 32768      (B) 8      (C) 64      (D) -8      (E) -64
- (2) Which of the following pairs of numbers has a greatest common factor of 24?
- (A) 24 and 36      (B) 48 and 64      (C) 36 and 240      (D) 48 and 576      (E) 72 and 120
- (3) Given that the four-sided figure is a rectangle, and the perimeter of the rectangle is 84, find the diagonal of the rectangle.
- 
- (A) 42      (B) 60      (C) 72      (D) 216      (E) 30
- (4) What is the ratio of three quarts to five cups written as a decimal?
- (A) 2.4      (B) 0.6      (C) 1.2      (D) 4.8      (E) 19.2
- (5)  $13 \times \frac{16}{17} =$
- (A)  $11 \frac{5}{17}$       (B)  $12 \frac{16}{17}$       (C)  $12 \frac{5}{17}$       (D)  $12 \frac{4}{17}$       (E)  $11 \frac{4}{17}$
- (6) If Brian averages 235 on his first eight number sense contests of the year and averages 325 on his last two number sense contests of the year, what is his average for the 10 contests?
- (A) 280      (B) 255      (C) 253      (D) 265      (E) 270
- (7)  $10 \text{ ft}^2$  equal to what in square inches?
- (A) 120      (B) 1200      (C) 22      (D) 1440      (E) 100
- (8) How many of the following triples would form a right triangle?
- I. 2, 3, 5      II.  $8, 8\sqrt{3}, 16$       III. 12, 35, 37      IV. 10, 15, 20      V. 10, 24, 26
- (A) 0      (B) 1      (C) 2      (D) 3      (E) 4
- (9) What is the diameter of a circle with equal area and circumference?
- (A) 4      (B) 2      (C) 1      (D) 6      (E) 20
- (10) How many hours are in the month of July and August combined?
- (A) 1464      (B) 1488      (C) 1440      (D) 744      (E) 720

- (11) The sum of the 9<sup>th</sup> triangular number, the 10<sup>th</sup> triangular number, the 23<sup>rd</sup> triangular number and the 24<sup>th</sup> triangular number is  
(A) 576 (B) 100 (C) 66 (D) 900 (E) 676
- (12) How many whole numbers divide into 324 with a remainder of 0?  
(A) 15 (B) 16 (C) 12 (D) 14 (E) 10
- (13) Find the largest possible integer that the third side of a triangle can have if its other two sides are 18 and 11.  
(A) 18 (B) 197 (C) 8 (D) 28 (E) 29
- (14)  $1 + 2 + 3 + 4 + \dots + 35 =$   
(A) 315 (B) 1260 (C) 324 (D) 1225 (E) 630
- (15)  $1_8 + 2_8 + 3_8 + 4_8 + \dots + 14_8$  equals what number in base 8?  
(A) 96 (B) 116 (C) 105 (D) 151 (E) 210
- (16) If the angles of a hexagon are  $3x + 20$ ,  $5x - 10$ ,  $3x + 40$ ,  $5x + 70$ ,  $8x - 12$ , and  $x + 12$ , then  $x =$  \_\_\_\_\_ degrees  
(A) 25 (B) 24 (C) 30 (D) 40 (E) 38.4
- (17) If  $0.727272\dots = \frac{A}{B}$ , where  $\frac{A}{B}$  is a common fraction, find the value of  $A + B$ .  
(A) 57 (B) 11 (C) 31 (D) 19 (E) 171
- (18) First class postage cost 55 cents. If books of stamps contain 20 stamps in each book, how many full books can you buy for \$300?  
(A) 10 (B) 27 (C) 28 (D) 53 (E) 12
- (19) How many numbers between 100 and 1000 are perfect squares or perfect cubes of a whole number?  
(A) 26 (B) 27 (C) 19 (D) 20 (E) 25
- (20) Find the temperature in Celsius, that when multiplied by 3.4 is equivalent to the corresponding value in Fahrenheit.  
(A) 20 (B) 25 (C) 30 (D) 15 (E) 10

- (21)  $1^3 + 2^3 + 3^3 + 4^3 + 5^3 + 6^3 =$   
 (A) 441 (B) 9261 (C) 651 (D) 273 (E) 1764
- (22) A brand of pasta costs \$7.50 for 48 ounces. One pound of this pasta would cost  
 (A) \$ 1.56 (B) \$ 3.75 (C) \$ 2.50 (D) \$ 1.50 (E) \$ 22.50
- (23) If  $A > 1$ , find  $k$  if  $(A^{25} \div A^{14})^3 \times (A^{22})^2 = A^{11k}$ .  
 (A) 2 (B) 3 (C) 5 (D) 6 (E) 7
- (24) If the  $x$ -intercept is  $(C, 0)$  and the  $y$ -intercept is  $(0, D)$  on the straight line  $6y - 8x = 96$ , then  $C + D =$   
 (A) 8 (B) -4 (C) 48 (D) -48 (E) 4
- (25) If a rectangle with length,  $l$ , and width,  $w$ , has an area of 54 and a perimeter of 30, then the diagonal will have a measure between which two integers?  
 (A) 7 and 8 (B) 8 and 9 (C) 9 and 10 (D) 10 and 11 (E) 11 and 12
- (26)  $12\frac{3}{5} \times 12\frac{2}{5} =$   
 (A)  $144\frac{6}{25}$  (B) 145 (C)  $156\frac{6}{25}$  (D)  $157\frac{1}{5}$  (E)  $145\frac{1}{5}$
- (27) If the area of a rhombus is 120, the measures of the diagonals are integers, and the perimeter is 52, find the length of the longer diagonal.  
 (A) 26 (B) 24 (C) 20 (D) 10 (E) 12
- (28)  $2x + 3y = 17$  and  $3x - 2y = 19$ , find the larger of the two numbers,  $x$  and  $y$ .  
 (A) 9 (B) 7 (C) 5 (D) 3 (E) 1
- (29)  $B$  is the units digit in the number  $487B$ , a number that is divisible by 9. Find the value of  $B$ .  
 (A) -1 (B) 4 (C) 6 (D) 8 (E) 10
- (30) Find the value of  $x + y$  in the figure to the right? (Not drawn to scale)

- (31) If  $x + y = 20$  and  $xy = 10$ , and  $x^2 + kxy + y^2 = 200$ , where  $k$  is an integer, find the value of  $k$ .  
(A)  $-20$  (B)  $-18$  (C)  $18$  (D)  $20$  (E)  $12$
- (32) The line  $15x + 20y = 180$  has how many coordinates  $(p, q)$  where both  $p$  and  $q$  are both nonnegative integers.  
(A)  $3$  (B)  $4$  (C)  $0$  (D)  $2$  (E)  $1$
- (33) If a line passes through  $(a, 8a)$  and  $(3a, -20a)$ , given that  $a \neq 0$ , then the slope is \_\_\_\_\_.  
(A)  $14$  (B)  $-14$  (C)  $1/14$  (D)  $-1/14$  (E)  $-6$
- (34) Torin set a school record for most points by one person in a basketball game for his school. He scored  $37.5\%$  of the  $96$  points of his team. How many points did Torin score?  
(A)  $36$  (B)  $32$  (C)  $40$  (D)  $37.5$  (E)  $60$
- (35)  $PQR$  is a right triangle with  $90$  degree angle at  $Q$ . If  $PR$  has length  $16\sqrt{2}$ , and  $PQ$  has length  $8\sqrt{3}$ , then  $QR =$   
(A)  $8\sqrt{5}$  (B)  $16$  (C)  $8\sqrt{3}$  (D)  $8\sqrt{2}$  (E)  $5\sqrt{8}$
- (36) How much has to be invested at  $6\%$  simple interest for five years to earn  $\$750.00$  in interest?  
(A)  $\$2500.00$  (B)  $\$5000.00$  (C)  $\$4000.00$  (D)  $\$3250.00$  (E)  $\$1750.00$
- (37) How many prime numbers are between  $75$  and  $100$ ?  
(A)  $2$  (B)  $3$  (C)  $4$  (D)  $5$  (E)  $6$
- (38) If  $3$  quarts are added to  $12$  pints, how many gallons are there?  
(A)  $1.5$  (B)  $2$  (C)  $2.5$  (D)  $2.25$  (E)  $4.5$
- (39) If  $Ax + 5y = C$  passes through  $(4, 12)$  is perpendicular to  $5x - 6y = 17$ , then what is the value of  $C$ ?  
(A)  $84$  (B)  $90$  (C)  $6$  (D)  $96$  (E)  $17$
- (40) How many combinations of nickels, dimes and quarters are there given the money has a value of  $55$  cents?  
(A)  $9$  (B)  $15$  (C)  $11$  (D)  $10$  (E)  $12$
- (41) Roosevelt is going to the store. Three-fifths of the way, he stops to talk with Kevin. He then continues for  $6$  km and reaches the store. How many kilometers does he travel altogether?  
(A)  $9$  (B)  $15$  (C)  $20$  (D)  $18$  (E)  $4.5$
- (42) What is the area of a triangle with coordinates  $P(5, 11)$   $Q(0, 14)$ , and  $R(0, -12)$ ?  
(A)  $24$  (B)  $130$  (C)  $286$  (D)  $65$  (E)  $143$

- (43) If the sum of 10 consecutive even integers is 310, find sum of the integers below the median.  
(A) 145 (B) 140 (C) 160 (D) 150 (E) 130
- (44) Krishna can work a number sense test in 12 minutes. Alexis can work a number sense test in 8 minutes. How long would it take them if they worked together to the nearest tenth of a minute.  
(A) 10 (B) 9.6 (C) 4.8 (D) 5 (E) 4.9
- (45) Find the sum of the 5<sup>th</sup> pentagonal number and the 5<sup>th</sup> triangular number.  
(A) 40 (B) 50 (C) 54 (D) 48 (E) 60
- (46) In eighth grade, the ratio of boys to girls was 3:5. If 28 boys are added to the group, the ratio of boys to girls is now 1:1. How many students were in the original group?  
(A) 112 (B) 14 (C) 140 (D) 120 (E) 96
- (47) If the y-intercept and x-intercept of  $f(x) = mx + 10$  add to  $-5$ , then the value of  $m$  is  
(A)  $-\frac{1}{3}$  (B)  $\frac{1}{3}$  (C)  $\frac{2}{3}$  (D)  $-\frac{2}{3}$  (E) 3
- (48) If  $4^{x+3} = 100$ , then  $4^{x+5} =$   
(A) 25 (B) 6.25 (C) 6400 (D) 400 (E) 1600
- (49)  $534_8 \times 111_8$  is equal to what number in base 8.  
(A) 61474 (B) 6074 (C) 60474 (D) 5074 (E) 61274
- (50) A 4 by 4 by 4 cube is made up of 64 individual unit cubes. The faces of the 4 by 4 by 4 cube are painted red. How many of the unit cubes have no paint on them?  
(A) 27 (B) 16 (C) 12 (D) 8 (E) 4

**Middle School Virtual Challenge Meet #3**  
**4<sup>th</sup> - 6<sup>th</sup> Grade - Number Sense**

Name \_\_\_\_\_  
 School \_\_\_\_\_  
 Grade            5            6  
 Classification   A            2A            3A            4A            5A            6A

Final \_\_\_\_\_  
 2<sup>nd</sup> \_\_\_\_\_  
 1<sup>st</sup> \_\_\_\_\_  
 Score                                  Initials

Read directions carefully  
 before beginning test

**DO NOT UNFOLD THIS SHEET  
 UNTIL TOLD TO BEGIN**

**Directions:** Do not turn this page until the proctor gives the signal to begin. This is a ten-minute test. There are 80 problems. Solve accurately and quickly as many as you can in the order in which they appear. ALL PROBLEMS ARE TO BE SOLVED MENTALLY without the help of paper, pencil, or calculator. Write only the answer in the space provided at the end of each problem. Problems marked with an (\*) require approximate integral answers; any answer to a problem with an *asterisk* that is within five percent of the exact answer will be scored correct; all other problems require exact answers.

**STOP – WAIT FOR SIGNAL!**

|--|---|

(39)  $125 \times 408 =$  \_\_\_\_\_

\*(40)  $33\frac{1}{3} \times 435 =$  \_\_\_\_\_

(41) If  $x = 4.4$ , then  $18 - 3x =$  \_\_\_\_\_ (decimal)

(42)  $\frac{5}{4} + \frac{5}{2} =$  \_\_\_\_\_ (mixed number)

(43) A number,  $4x$ , subtracted from 93 equals 61.  $x =$  \_\_\_\_\_

(44) The area of a rectangle is 90, and the length of one side is 18. The perimeter is \_\_\_\_\_

(45) How much greater is the area of a square with perimeter of 64 than the area of a square with perimeter 56? \_\_\_\_\_

(46)  $17^2 =$  \_\_\_\_\_

(47)  $4\frac{2}{3} + 3\frac{5}{6} =$  \_\_\_\_\_ (mixed number)

(48) In the sequence:  
7, 13, 19, 25, 31,  $p$ ,  $q$ , ... ,  $p + q =$  \_\_\_\_\_

(49) 11011 (base 2) = \_\_\_\_\_ base 4

\*(50)  $75^3 =$  \_\_\_\_\_

(51) The perimeter of nonagon with side 23 is \_\_\_\_\_

(52)  $\frac{13}{17} + \frac{17}{13} =$  \_\_\_\_\_ (mixed number)

(53) If  $6x + 5 = 19$ , then  $x =$  \_\_\_\_\_ (mixed number)

(54) If set  $A = \{n,u,m,b,e,r,s\}$  and set  $B = \{l,a,b,o,r,s\}$  then how many elements are in  $A \cap B$ ? \_\_\_\_\_

(55)  $113 \times 105 =$  \_\_\_\_\_

(56) 264 base 7 = \_\_\_\_\_ base 10

(57) 93 base 10 = \_\_\_\_\_ base 8

(58)  $64 \times 32 \div 8 =$  \_\_\_\_\_

(59) The sum of the number of faces, edges, and vertices on a cube is \_\_\_\_\_

\*(60) A circle has a radius of 21.  
The area of the circle is \_\_\_\_\_

(61)  $-20 \div 2 + (-36) \div 3 =$  \_\_\_\_\_

(62)  $155^2 - 145^2 =$  \_\_\_\_\_

(63)  $\frac{2}{3} + \frac{3}{4} + \frac{4}{5} =$  \_\_\_\_\_ (improper fraction)

(64) What is the volume of a rectangular box with sides 8 cm, 8 cm and 25 cm? \_\_\_\_\_  $\text{cm}^3$

(65)  $15^2 + 45^2 =$  \_\_\_\_\_

(66)  $111 \times 831 =$  \_\_\_\_\_

(67) If  $13 = \sqrt{x}$ , then  $x =$  \_\_\_\_\_

(68) The area of a parallelogram with base 14 and height 22 is \_\_\_\_\_

(69)  $12^3 =$  \_\_\_\_\_

\*(70)  $775^2 =$  \_\_\_\_\_

(71) If a pair of dice is thrown, the probability that the sum of the dice is 2 or 3 is \_\_\_\_\_

(72) If the perimeter of a regular hexagon is 81, then what is the length of one side? \_\_\_\_\_ (decimal)

(73)  $57^2 =$  \_\_\_\_\_

(74) How many positive whole numbers make the inequality  $2x - 16 \leq 12$  true? \_\_\_\_\_

(75) The distance between -54 and 26 is \_\_\_\_\_

(76)  $1 + 2 + 3 + \dots + 40 =$  \_\_\_\_\_

(77)  $1 + 3 + 5 + 7 + \dots + 89 =$  \_\_\_\_\_

(78) In an acute triangle, how many of the angles are less than  $90^\circ$ ? \_\_\_\_\_

(79)  $16^2 - 9^2 = 5 \times$  \_\_\_\_\_

\*(80)  $75^2 + 225^2 =$  \_\_\_\_\_

Read directions carefully  
before beginning test

**DO NOT UNFOLD THIS SHEET  
UNTIL TOLD TO BEGIN**

**Directions:** Do not turn this page until the proctor gives the signal to begin. This is a ten-minute test. There are 80 problems. Solve accurately and quickly as many as you can in the order in which they appear. ALL PROBLEMS ARE TO BE SOLVED MENTALLY without the help of paper, pencil, or calculator. Write only the answer in the space provided at the end of each problem. Problems marked with an (\*) require approximate integral answers; any answer to a problem with an asterisk that is within five percent of the exact answer will be scored correct; all other problems require exact answers.

**STOP – WAIT FOR SIGNAL!**

|--|---|

\*(40)  $667 \times 839 =$  \_\_\_\_\_

(41)  $25025 \times 23 =$  \_\_\_\_\_

(42) A decagon has \_\_\_\_\_ distinct diagonals

(43) The sum of the measures of the interior angles of a decagon is \_\_\_\_\_<sup>o</sup>.

(44) The sum of the positive integral divisors of 72 is \_\_\_\_\_

(45) Find the sum of the next three terms in the arithmetic sequence 11, 15, 19, 23, ... . \_\_\_\_\_

(46)  $\frac{25}{21} + \frac{21}{25} =$  \_\_\_\_\_ (mixed number)

(47) The volume of a cube is 729.  
Find the surface area of the cube. \_\_\_\_\_

(48)  $455_{15} =$  \_\_\_\_\_<sub>10</sub>

(49) The area of a triangle with base 24 and height  $12\frac{1}{2}$  is \_\_\_\_\_

\*(50)  $5733 \div \frac{3}{11} =$  \_\_\_\_\_

(51)  $547_8 - 263_8 =$  \_\_\_\_\_<sub>8</sub>

(52)  $21\frac{1}{3}\%$  = \_\_\_\_\_ (common fraction)

(53)  $93 \times 108 =$  \_\_\_\_\_

(54)  $122 \times 104 =$  \_\_\_\_\_

(55)  $15^3 =$  \_\_\_\_\_

(56)  $3^{12} \times 3^{11} \times 3^{10} \times \dots \times 3^2 \times 3 = 3^x$ .  $x =$  \_\_\_\_\_

(57) If set  $A = \{p,l,a,n,e,s\}$  and set  $B = \{p,r,i,s,t,n,e\}$ ,  $A \cup B$  has \_\_\_\_\_ elements

(58) If  $15 - x < 4x$ , then  $x >$  \_\_\_\_\_

(59)  $2^{33} \div 11$  has a remainder of \_\_\_\_\_

\*(60)  $\sqrt{372010} =$  \_\_\_\_\_

(61) When reduced  $0.555\dots = \frac{N}{D}$ .  $N + D =$  \_\_\_\_\_

(62)  $632_9 \times 111_9 =$  \_\_\_\_\_<sub>9</sub>

(63) A black bag contains 11 green, 7 blue, and  $x$  red marbles. Find  $x$  if the probability of drawing a red marble is 40%. \_\_\_\_\_

(64)  $4^3 + 4^2 + 4^1 = 4 \times$  \_\_\_\_\_

(65)  $\frac{13!+11!}{12!} =$  \_\_\_\_\_ (mixed number)

(66) If  $x^2 = 25$ , then  $(6x - 8)(6x + 8) =$  \_\_\_\_\_

(67)  $21 \times \frac{19}{17} =$  \_\_\_\_\_ (mixed number)

(68) The area of a square with diagonal 18 is \_\_\_\_\_

(69) If one of the roots of  $x^2 + kx + 36 = 0$  is 4, then  $k =$  \_\_\_\_\_

\*(70)  $723000 \div 452 =$  \_\_\_\_\_

(71)  $243 \times 247 =$  \_\_\_\_\_

(72) If the odds of an event successfully happening are 20 to 15, then the probability of that event happening is \_\_\_\_\_

(73) If P and Q are roots of  $f(x) = 2.5x^2 - 28x + 12$ , then  $PQ + P + Q =$  \_\_\_\_\_

(74) The probability of rolling a sum of 5 or 9, with two 6-sided die is \_\_\_\_\_

(75)  $5^3 + 6^3 =$  \_\_\_\_\_

(76)  $336 \times 125 =$  \_\_\_\_\_

(77)  $\frac{14!}{12!} + 14 = x^2$ , where  $x$  is a positive number.  $x =$  \_\_\_\_\_

(78)  $21^2 + 42^2 =$  \_\_\_\_\_

(79)  $\{h,u,s,k,i,e,b\}$  has \_\_\_\_\_ 2-element subsets

\*(80)  $(1 + 3 + 5 + 7 + 9 + 11 + 13 + \dots + 49)^2 =$  \_\_\_\_\_

**THE**  **VIRTUAL MEET EXPERIENCE**

PRESENTS

2022-2023

**MIDDLE SCHOOL  
VIRTUAL CHALLENGE MEET #3**

**Science**

DO NOT OPEN TEST UNTIL TOLD TO DO SO

1. What is a correct unit of measurement for temperature?  
A) bars  
B) PSI  
C) K  
D) N
2. Why is RNA used to transfer the genetic code from DNA to create a protein?  
A) DNA is unable to leave the nucleus.  
B) The ribosome cannot read the nucleotides of DNA.  
C) The tRNA will not connect properly to the triplet of DNA.  
D) All the answers are correct
3. What type of energy transfer is occurring when a bunny shivers when it is cold causing an increase in blood flow which leads to the bunny's body to convert stored energy into other molecules producing heat?  
A) chemical to thermal  
B) radiant to chemical  
C) electrical to thermal  
D) mechanical to radiant
4. DNA is made of individual building blocks known as  
A) RNA.  
B) nucleotides.  
C) amino acids.  
D) nucleic acids.
5. A marsh in Florida has many fish species as well as alligators, migrating cranes, snapping turtles and many other animals that enjoy the high nutrient filled waters and moderate temperatures. What would correctly describe the marsh?  
A) An ecosystem  
B) A community  
C) A biome  
D) A microhabitat

6. What is the total amount of liquid that was used from the burette in the image?  
A) 10.6 mL  
B) 11.5 mL  
C) 11.4 mL  
D) 10.4 mL

7. What type of chemical reaction is this:  $2\text{AgBr} \rightarrow 2\text{Ag} + \text{Br}_2$   
A) Synthesis  
B) Decomposition  
C) Combustion  
D) Double replacement

8. What can be determined by the following information in the data table below?

| Mass of beaker (g) | Volume of beaker (mL) | Volume of water added (mL) | Mass of beaker and water added (g) |
|--------------------|-----------------------|----------------------------|------------------------------------|
| 31.29              | 50                    | 17                         | 48.29                              |
| 49.30              | 100                   | 78                         | 127.3                              |
| 68.6               | 150                   | 112                        | 180.6                              |

- A) The mass of a beaker is proportional to its volume
  - B) The mass of water is equal to its volume
  - C) The volume of a beaker is equal to the mass of water
  - D) None of the above are correct
9. How do microvilli aid in absorption of nutrients in the small intestine?
- A) By increasing the surface area of the cells
  - B) By increasing the numbers of cells
  - C) By decreasing the number of folds in the small intestine walls
  - D) By decreasing the length of the small intestine
10. Which of the following scenarios best defines acceleration?
- A) You ride your bike around the block at 10 mph.
  - B) A bowling ball travels down the runway at 15 mph.
  - C) A jaguar runs straight through the grass at 45 mph.
  - D) A dog runs North 20 feet in 10 seconds.
11. A turgid plant cell wall has pressure pushing on it as the water has moved into the \_\_\_\_\_ causing the entire cell to swell.
- A) nucleus
  - B) cytoplasm
  - C) vacuole
  - D) chloroplasts
12. The term sea breeze refers to the wind that blows from a large body of water towards land due to the differences in air pressure that is created by heating differences of water and land. This movement of energy is called
- A) conduction
  - B) convection
  - C) radiation
  - D) prevailing
13. Many coastal regions are having difficulty with reduced fish populations due to overfishing. What would not be a good solution to help increase the fish populations?
- A) Reduce the number of fish caught per person
  - B) Provide artificial coral reefs to help provide additional habitats
  - C) Restrict fishing of certain types of fish to particular seasons
  - D) Introduce non-native fish to the communities

14. Which atomic model below has the least mass?

A)

B)

C)

D)

15. Which of these statements is correct regarding asexual reproduction and not sexual reproduction?

A) The genetic material of the offspring is identical to the parents.

B) The offspring have traits related to the parents.

C) The genetic material is not identical to the parents, but they each contribute.

D) The offspring will grow and develop.

16. A student poured sand into a graduated cylinder up to 16 mL and then put 30 mL of water into the graduated cylinder. The water level in the graduated cylinder read 40 mL. Determine the volume of air that surrounded the sand prior to the water being poured.

A) 16 mL

B) 14 mL

C) 10 mL

D) 6 mL

17. As Jessica continues to run her marathon her heartbeat and breathing rate increase. What is the possible reason her body responds in such a way?

A) Release of increased carbon dioxide

B) Decreased body temperature

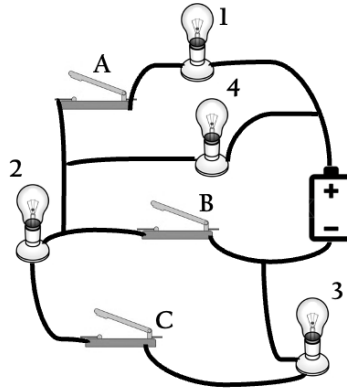

C) Increased water retention

D) Release of built-up toxins

18. Which combination of closed switches would only turn on lightbulb 2, 3, and 4?

- A) A and C
- B) A, B, and C
- C) B and C
- D) A and B

19. What process causes mushroom rocks like the one in the image to form?

- A) Deposition
- B) Chemical weathering
- C) Sublimation
- D) Wind erosion

20. In which trophic level would radiant energy be converted into chemical energy?

- A) Primary consumer
- B) Secondary consumer
- C) Producer
- D) Decomposer

21. Olympus Mons is a volcano that was found on the surface of

- A) Mars.
- B) Jupiter.
- C) Saturn.
- D) Neptune.

22. What amount of Newtonian force does the Earth exert on a person that has a mass of 62 kg?

- A) 6.32 N
- B) 607.6 N
- C) 0.16 N
- D) 1.58 N

23. A scientist crosses two plants and records the outcomes of the offspring in the data table below. What would be a possible conclusion about the genetic patterns seen in the offspring?

|                    | Plant 1 | Plant 2 | Plant 3 | Plant 4 | Plant 5 |
|--------------------|---------|---------|---------|---------|---------|
| <b>Petal Color</b> | Purple  | White   | Purple  | Purple  | White   |
| <b>Leaf Length</b> | Long    | Short   | Short   | Short   | Long    |

- A) Purple petal color is dominant
- B) Long leaf length is recessive
- C) The parent plants were heterozygous
- D) Both petal color and leaf length have two alleles

24. An animal cell undergoes these following:  
Chromatin condenses  
Centrioles extend spindle fibers  
Nuclear membrane dissolves

What would be the next step of the process?

- A) Sister chromatids begin to separate
  - B) Two new nuclear membranes form
  - C) Chromosomes migrate to the equatorial plate
  - D) The cytoplasm divides and two new daughter cells are created
25. During an adaptive immune response, the antigen-presenting cell helps to activate what two types of lymphatic cells?
- A) T cells and B cells
  - B) Macrophages and neutrophils
  - C) B cells and macrophages
  - D) Neutrophils and mast cells

26. When making an energy pyramid, how many energy levels should a student draw from the food web below?

- A) 4
- B) 3
- C) 5
- D) 6

27. New islands in the Atlantic Ocean form from ancient volcanoes rising from the sea floor called

- A) mid-oceanic ridges.
- B) seamounts.
- C) abyssal plain.
- D) rift valley.

28. If a student wanted to test the maximum temperature of boiling water once solutes are added, what temperature range on the thermometer is most appropriate to use?

- A)  $-10^{\circ}\text{C}$  to  $100^{\circ}\text{C}$
- B)  $-20^{\circ}\text{C}$  to  $120^{\circ}\text{C}$
- C)  $-30^{\circ}\text{C}$  to  $50^{\circ}\text{C}$
- D)  $-30^{\circ}\text{C}$  to  $212^{\circ}\text{C}$

29. What is true of an invasive species?

- A) They do not add competition to a community they are not native
- B) They have no natural predators in the community they are not native
- C) They are always predatory
- D) They thrive in communities in which they are the tertiary consumer

30. What does the image to the side represent?

- A) The changes of the seasons due to the Earth's tilt
- B) The changes in ocean tides due to the Earth's tilt
- C) The length of Earth's revolution
- D) The changes in lunar phases

31. Parthenogenesis is a unique form of asexual reproduction that occurs commonly in reptiles when a female does not have a suitable mate. In this situation one of her eggs will replicate the genetic material and develop into a zygote. What is true about the offspring that results?

- A) It will be genetically identical to the mother
- B) It will lack genetic material
- C) It will have twice as many chromosomes as the mother
- D) It will be unable to reproduce later in life

32. Randy was given the following information about 4 unknown elements and how they react with chlorine. Which of the two elements is most likely in the same periodic table column?

| Unknown Element (X) | Atomic Radii | Type of Element | Reactivity with Chlorine |
|---------------------|--------------|-----------------|--------------------------|
| 1                   | 166          | Metal           | $XCl$                    |
| 2                   | 71           | Nonmetal        | $XCl_3$                  |
| 3                   | 107          | Nonmetal        | $XCl_3$                  |
| 4                   | 176          | Metal           | $XCl_2$                  |

- A) 1 and 2
- B) 2 and 3
- C) 3 and 4
- D) 1 and 4

33. The image below is indicating what type of weather will occur?

- A) Sunny with some cloud cover
- B) Possible tornado
- C) Dry calm conditions
- D) Nothing can be determined

34. Each column of the periodic table categorizes elements based primarily on their
- A) energy levels.
  - B) number of neutrons.
  - C) reactivity with other elements.
  - D) melting and boiling points.

35. Any chemical that can speed up a reaction, but that is not used up the reaction is called a(n)
- A) catalyst.
  - B) precipitate.
  - C) messenger.
  - D) indicator.

36. Which statement below does not describe an astronomical unit correctly?
- A) it is approximately 93 million miles
  - B) it is the average distance from the Earth to the Sun
  - C) the size of the Milky Way galaxy
  - D) it is approximately 150 million km

37. If a fixed pulley system required 40 N of effort to pick up an object, how much effort would be required in a moveable pulley system?
- A) 40 N
  - B) 80 N
  - C) 20 N
  - D) 50 N

38. If two girls pushed on a large crate equally according to the image below, in what direction will the box move?

39. Which list contains elements with the most reactivity?

- A) Xe, Li, Cs, B
- B) S, Ne, Na, K
- C) F, K, Rb, H
- D) Al, C, Cl, Ar

|          |          |              |           |          |            |           |            |           |            |            |
|----------|----------|--------------|-----------|----------|------------|-----------|------------|-----------|------------|------------|
| 1<br>H   |          |              |           |          |            |           |            |           |            | 2<br>He    |

| 87<br>Fr | 88<br>Ra | 89-102<br>** | 103<br>Lr | ...      | 113<br>Uut | 114<br>Fl | 115<br>Uup | 116<br>Lv | 117<br>Uus | 118<br>Uuo |

40. An ecological succession would least likely occur in which of the following scenarios?
- A) A farmer's crops are burned, and the soil is overturned.
  - B) A local grassland is cleared out for a new apartment complex and warehouse facility.
  - C) A volcano erupts with lava flow for 2 km.
  - D) A firework show in a dry area causes a grass fire that soon becomes a forest fire.

41. What will happen over time to the area labeled A-B in the contour map below?

- A) The area will become more steep due to wind and water erosion
  - B) The area will become more steep due to deposition
  - C) The area will become less steep due to deposition
  - D) The area will become less steep due to weathering
42. What is correctly matched with its weather phenomena?
- A) El Nino brings wetter weather to the southern united states
  - B) La Nina causes warm ocean water in the Pacific off the coast of South America
  - C) Derecho storms are short-lived microbursts with minimal winds and precipitation
  - D) La Nina will decrease rainfall in Australia and increase daytime temperatures
43. Vitamin D is fat soluble and should be taken with a meal for maximum absorption. What is also true of Vitamin D?
- A) it can readily pass through the cell membrane
  - B) it is unable to pass the cell membrane and requires and transport protein
  - C) it will be easily dissolved in the blood plasma
  - D) it will not be absorbed by the body and pass through your urine

44. As a neutral atom gains an electron what term(s) would appropriately describe it after the addition?
- A) Positive cation
  - B) Negative anion
  - C) Positive anion
  - D) Negative cation
45. Which statement is an example of work?
- A) Grace pushes against the wall and soon becomes exhausted.
  - B) A FedEx worker picks up a box over his shoulders and carries it to the door.
  - C) An ice skater skates around the rink and jumps in the air to do a spin.
  - D) A student carries their backpack to another class.
46. As a comet gets closer to the Sun it warms and begins to release gas creating the visible comet tail. This process is called
- A) evaporation.
  - B) upwelling.
  - C) outgassing.
  - D) accretion.
47. A student was observing a human cell and needed to determine if it was a gamete or a somatic cell. What observation would best be used to determine that it is a somatic cell?
- A) It contains 46 chromosomes
  - B) It has a nuclear membrane
  - C) It does not have an X chromosome
  - D) It has half of its genetic material
48. During sourdough bread production, yeast and bacteria go through the process of fermentation to produce
- A) alcohol and carbon dioxide.
  - B) lactic acid and glucose.
  - C) glucose and energy.
  - D) alcohol and starch.
49. What is the appropriate shorthand description of the following location? Latitude is always written first. 25 degrees west of the prime meridian and 30 degrees north of the equator
- A) 25°W, 30°N
  - B) 175°W, 60°N
  - C) 60°N, 175°W
  - D) 30°N, 25°W

50. Using the following information identify the water dragon's scientific name.

|                               |        |                               |
|-------------------------------|--------|-------------------------------|
| 1. Fur present                | a. Yes | <i>Leo tigris</i>             |
|                               | b. No  | go to step 2                  |
| 2. Scales present             | a. Yes | go to step 4                  |
|                               | b. No  | go to step 3                  |
| 3. Smooth skin                | a. Yes | go to step 5                  |
|                               | b. No  | <i>Asterias rubens</i>        |
| 4. Breathes with gills        | a. Yes | <i>Perca fluviatillis</i>     |
|                               | b. No  | <i>Intellagama lesueurii</i>  |
| 5. Goes through metamorphosis | a. Yes | <i>Phyllobates terribilis</i> |
|                               | b. No  | <i>Platyhelminthes</i>        |

- A) *Asterias rubens*
- B) *Perca fluviatillis*
- C) *Leo tigris*
- D) *Intellagama lesueurii*

1. "The Incident on Kings Street" occurred on March 5, 1770. Crispus Attucks was a victim of the confrontation which is known today as the \_\_\_\_.

- A. Boston Tea Party
- B. Boston Massacre
- C. Stamp Act Congress
- D. Battle of Lexington and Concord

2. The map above shows the Proclamation Line. What did the line indicate?

- A. The border between British and French in North America
- B. Trade was prohibited with groups west of the line
- C. Colonists could not move west of the line
- D. The future locations of bases for a defensive perimeter

3. \_\_\_\_ was the location of the convention that created the 1836 Texas Constitution.

- A. Austin
- B. Houston
- C. San Antonio
- D. Washington-on-the-Brazos

- *Delegate to Continental Congress for Massachusetts*
- *Member of the drafting committee for the Declaration of Independence*
- *First Vice President of the United States*
- *Second President of the United States*

4. Who is described by the list above?

- A. George Washington
- B. Thomas Jefferson
- C. Alexander Hamilton
- D. John Adams

5. The Mexican government banned \_\_\_\_\_, but the 1836 Texas Constitution allowed it.

- A. Slavery
- B. Women's right to vote
- C. Public property
- D. Cattle farming

6. Rituals, architecture, observances, and holidays are examples of what?

- A. Examples of linguistic institutions
- B. Comparison of religious institutions
- C. Educational rights and practices
- D. Systems of government

7. Who was the British general who surrendered at the final major battle of the American Revolution?

- A. William Howe
- B. Henry Clinton
- C. John Burgoyne
- D. Charles Cornwallis

8. During the American Revolution in 1775-1777, most of the fighting was in which area?

- A. A
- B. B
- C. C
- D. D

9. Which of the following is a description of the middle colonies?

- A. Fertile land used for indigo and rice production
- B. Long summers and short winters
- C. Combination of trade and plantations
- D. All were royal colonies

10. The \_\_\_\_ economic system is characterized by collective ownership of all means of production.

- A. Socialist
- B. Free enterprise
- C. Market economy
- D. Communist

11. According to the \_\_\_\_, the King had a history of repeated “injuries and usurpations.”

- A. Declaration of the Causes and Necessity of Tanking up Arms
- B. Common Sense
- C. Declaration of Independence
- D. Olive Branch Petition

- I. Battle of Lexington and Concord*
- II. Declaration of the Causes and Necessity of Taking up Arms*
- III. Second Continental Congress*
- IV. Olive Branch Petition*

12. In 1775, which of the following is in the correct chronological order?

- A. I, III, IV, II
- B. II, I, III, IV
- C. IV, III, II, I
- D. I, IV, II, III

13. Which of the following is the definition of a monarchy?

- A. Religious rule
- B. Dictators who took control
- C. Hereditary rule
- D. Leadership voted into power

14. Which document written in 1620 described a social contract between adult males traveling to the New World?

- A. Fundamental Orders of Connecticut
- B. Mayflower Compact
- C. Virginia Declaration of Rights
- D. Maryland Act of Toleration

15. Paul Revere and William Dawes were midnight riders sent to warn the minutemen of incoming Redcoats and specifically warn which leaders of possible arrest?

- A. George Washington and John Adams
- B. John Adams and Sam Adams
- C. John Hancock and Patrick Henry
- D. Sam Adams and John Hancock

|             |                   |                     |
|-------------|-------------------|---------------------|
| Legislative | Executive         | Judicial            |
| A           | enforces the laws | Interprets the laws |

16. Which description best finishes the graphic?

- A. Conducts elections
- B. Makes the laws
- C. Interprets the laws
- D. Promotes civic participation

17. Who ordered the Alamo destroyed prior to the events in February 1836?

- A. Sam Houston
- B. William B. Travis
- C. James Fannin
- D. Juan Seguin

18. How can Congress override a presidential veto?

- A. Three-fourths vote for state legislatures
- B. They cannot override veto
- C. Two-thirds vote from each house of Congress
- D. Congress must appeal to the Supreme Court

19. Which of the following is defined as providing labor intensive work without the result of a tangible product?

- A. Retail industry
- B. Agriculture industry
- C. Manufacturing industry
- D. Service industry

20. Which of the following continents mostly have limited governments?

- A. North America and Africa
- B. North America and Europe
- C. Africa and Australia
- D. Asia and South America

21. Which of the following is a difference between the House of Representatives and the Senate?

- A. The senate's representation is based on population of eligible voters
- B. The house of representatives representation is based on population
- C. The senate has the ability to impeach and remove an elected official
- D. The house of representatives has the ability to negotiate and approve treaties

22. Sybil Ludington is best known for being part of which event?

- A. Reloading muskets during the Battle of Saratoga
- B. Spying on Redcoats for General Washington
- C. Making uniforms for the Continental Army
- D. Midnight Ride to warn minutemen of the Redcoats

23. Which country's alliance played the most significant role in the success of the American colonies in the Revolutionary War?

- A. France
- B. Britain
- C. Spain
- D. Mexico

24. In a free enterprise system, \_\_\_\_\_ makes the decision about what goods and services are produced?

- A. Government
- B. Aristocrats
- C. Individuals
- D. Tradition

25. Which of the following is known as the first written constitution in colonial America?

- A. Mayflower Compact
- B. Fundamental Orders of Connecticut
- C. Virginia Declaration of Rights
- D. Maryland Act of Toleration

26. The Somerset is a British ship mentioned in \_\_\_\_\_.

- A. Common Sense by Thomas Paine
- B. The Declaration of Independence by Thomas Jefferson
- C. Paul Revere's Ride by Henry Wadsworth Longfellow
- D. The Virginia Resolves by Patrick Henry

27. Which economic activity is defined as the "cultivation of land or ranching of animals"?

- A. Agriculture
- B. Retail
- C. Manufacturing
- D. Service

SPELLING - 3RD AND 4TH GRADE  
PRONOUNCER/VERIFIER LIST

Copyright 2022 ASW Enterprises, LLC

**PRONOUNCER:** Pronounce the words at the approximate rate of five per minute. A time indication is given after every five words.

Definitions should be given by the pronouncer for words which are marked with an asterisk\*. Abbreviated definitions are included for all words. Spaces are provided for sentences should you choose to use them; however, sentences are not required by UIL rules.

**VERIFIER:** Please listen carefully to make sure the words the pronouncer calls are clearly understood. Definitions should be given by the pronouncer for words which are marked with an asterisk\*. If there are words which should be pronounced again, notify the pronouncer after all the words have been called. Do not interrupt the pronouncer.
